Sigurnost

Vaš ZenFlame kamin izrađen je od Lightstone® materijala, razvijenog u sklopu našeg brenda i poznatog po izdržljivosti te otpornosti na vatru. Lightstone® nastaje od pomno odabranih prirodnih minerala, pa izgleda i djeluje iznimno autentično.

Proizvod je prošao stroga ispitivanja te je certificiran kao izrazito otporan na vatru, u skladu sa sljedećim normama:

- EN 13501-1: Klasifikacija građevinskih proizvoda i građevnih elemenata prema reakciji na požar.
- EN ISO 1182: Ispitivanje nezapaljivosti građevinskih materijala.
- EN ISO 11925-2: Ispitivanja reakcije građevinskih materijala na požar.

Materijal Lightstone® pouzdano štiti od topline i vatre te pruža sigurno mjesto za korištenje svijeća. Ipak, pri paljenju svijeća važno je pridržavati se uobičajenih sigurnosnih smjernica:

- Nikada ne ostavljajte upaljenu svijeću bez nadzora
- Držite je podalje od predmeta koji se mogu zapaliti
- Držite je izvan dohvata djece i kućnih ljubimaca.

Održavanje

Dok uživate u svijećama, možda ćete primijetiti malo čađe na polici kamina ili na zidu iza nje. Bez brige — to je sasvim normalno! Kako bi sve i dalje izgledalo uredno, čađu jednostavno obrišite vlažnom krpom. Redovito čišćenje spriječit će nakupljanje i pomoći da vaš prostor uvijek izgleda najbolje.

Recikliranje

Pakiranje

Nakon što raspakirate proizvod, razmislite da sačuvate glavnu kutiju. Elegantna crna kutija osmišljena je da bude čvrsta te da se može ponovno koristiti kao praktična kutija za pohranu vaših stvari.

Kartonske kutije u pravilu se mogu reciklirati kroz kućne programe odvajanja otpada. Spljoštite kutiju, uklonite ljepljivu traku i sve zaštitne materijale koji nisu od kartona te je odložite u spremnik za papir.

Svi zaštitni pjenasti materijali mogu se reciklirati te ih je potrebno odložiti u odgovarajući spremnik za recikliranje, a ne u uobičajeni kućni otpad.

Kamin

Na kraju vijeka trajanja kamin je potrebno zbrinuti odgovornim recikliranjem. Proizvod je pretežno izrađen od materijala koji se uobičajeno koriste u graditeljstvu. Kako biste ga pravilno reciklirali, odnesite ga u najbliže reciklažno dvorište koje prima građevinski otpad.

Svijeće

Nakon što potrošite svijeće, uklonite preostali vosak tako da staklenke ostavite u zamrzivaču preko noći ili pažljivo ulijete kipuću vodu. Kad su čiste, iskoristite staklenke za pohranu ili kao dekoraciju, ili ih reciklirajte zajedno sa staklom.
